

US Bottlers Cap Sorters

For over 25 years the U.S. Bottlers Rotary Cappers have provided reliable performance in a variety of cap applications.

The cappers are complemented by a complete line of cap sorting and feeding equipment, including elevator sorters, rotary sorters, vibratory sorters and pre-feeders, as well as other specialized equipment.

From simple designs that rely on gravity or centrifugal forces to achieve the correct positioning of caps for feeding to the capper, to more sophisticated mechanical sorters, our machines are capable of handling most types of closures.

Our cap sorters are offered in a variety of sizes providing accurate and efficient sorting and feeding of caps at speeds of up to 1000 CPM .

Please let us know what your cap sorting requirements are and we will recommend a suitable machine for your consideration.
